

# EPA PESTICIDE REGISTRATION

G IPL is one of India's leading agency providing third party evaluation, assessment, verification and monitoring services in the fields of environment, sustainability, building interiors, forestry, wildlife, climate change, environmental claims and fisheries. With the help of our skilled team of experienced professionals, we have rendered our services to numerous clients in India and overseas to make a distinguished and unique identity in the market.

Due to outbreak of COVID-19, there is a sudden upsurge in demand of disinfectant and sanitizers around the globe and in wake of it, the fraudulent products are circulating all over the market. EPA has been warning and issuing guidelines for manufacturers as well as consumers to be aware of such products and has tried making its legal requirements easier and faster to avoid shortages of effective ingredients to meet supply chain demands. EPA does not provide any third-party certifications; rather, there is a complex registration procedure to sell or distribute products in the US market or any buyer that demand or mandate by EPA registration.

We have decoded the process for you which otherwise seems difficult to understand and is hefty.

# EPA PESTICIDE REGISTRATION

## ESSENTIALLY:

1. Manufacturers have to provide the EPA with data, to show their products are effective against harder-to-kill viruses.
2. Once approved by EPA, the company can make marketing claims for its product's use against the novel and world-wide pandemic coronavirus.

## BENEFITS:

- Become a responsible manufacturer and lead the market.
- Earn greater profits.
- Reach larger consumer base.
- Save consumers from fake and ineffective products.
